MedBridge
Medicine donation, bridged

DEMO

How MedBridge works for NGOs

From verification to a confirmed collection — every screen, step by step.

1 NGO sign-in → 2 Verified access → 3 Browse approved donations → 4 Request a donation →
5 Request status → 6 Collection & handoff → 7 Notifications

Direction 1C concept preview · desktop and phone

All records are synthetic. Not a medical service.

1 NGO sign-in

MedBridge
Medicine donation, bridged

Get donated medicines to the people who need them.

Verified NGOs browse approved donations nearby, request what their patients need, and collect with a confirmed handoff.

- Every NGO verified by our team
- Only approved, in-date donations listed
- Code-confirmed collections

All records are synthetic. Not a medical service.

NGO sign-in

Log in to your verified NGO workspace.

Registering your NGO? Apply for verification

• DEMO

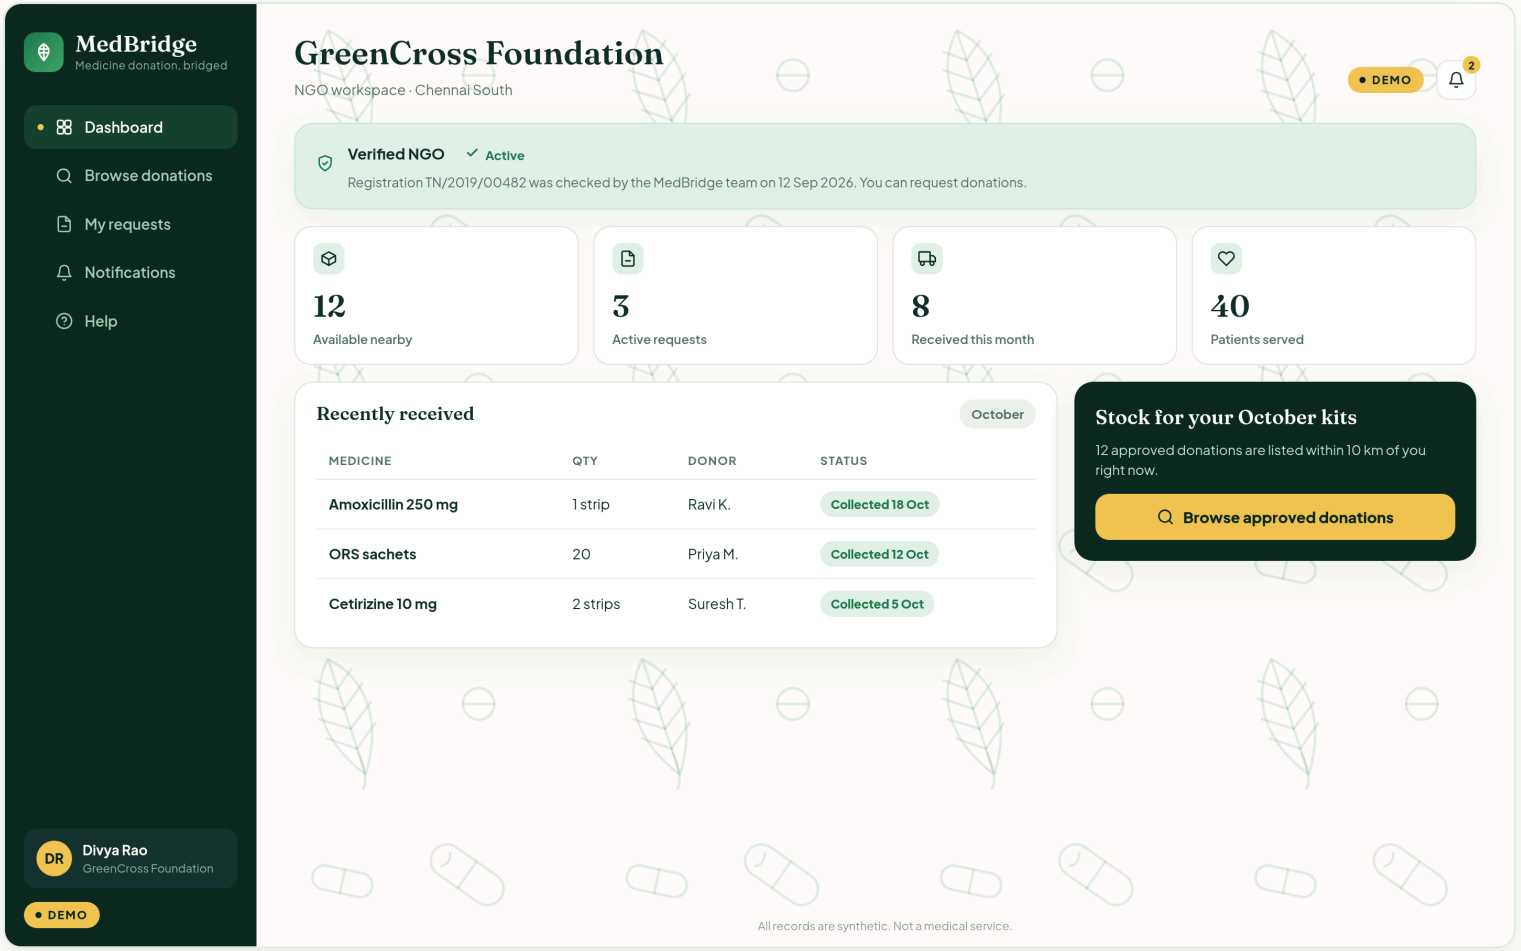

WHAT HAPPENS

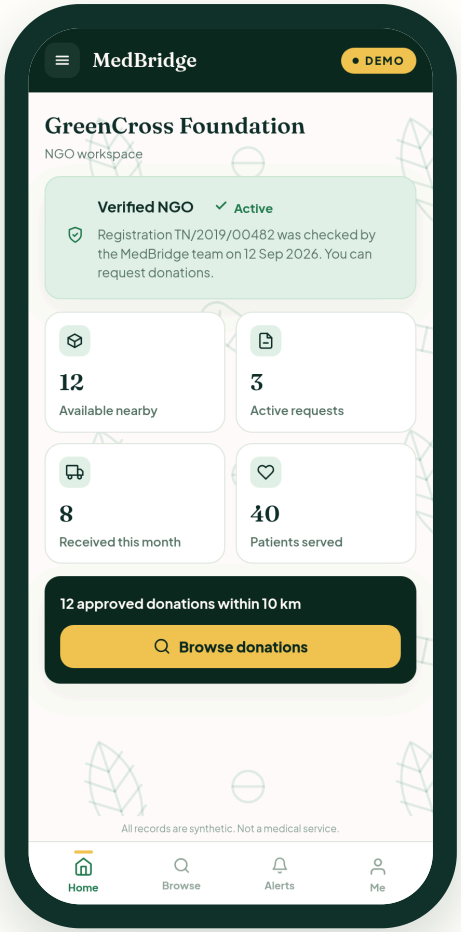

Divya logs in to GreenCross Foundation's NGO workspace. New NGOs apply for verification instead of a plain sign-up.

Who acts
The NGO
Next → Step 2 — Verified access

All records are synthetic. Not a medical service.

2 Verified access

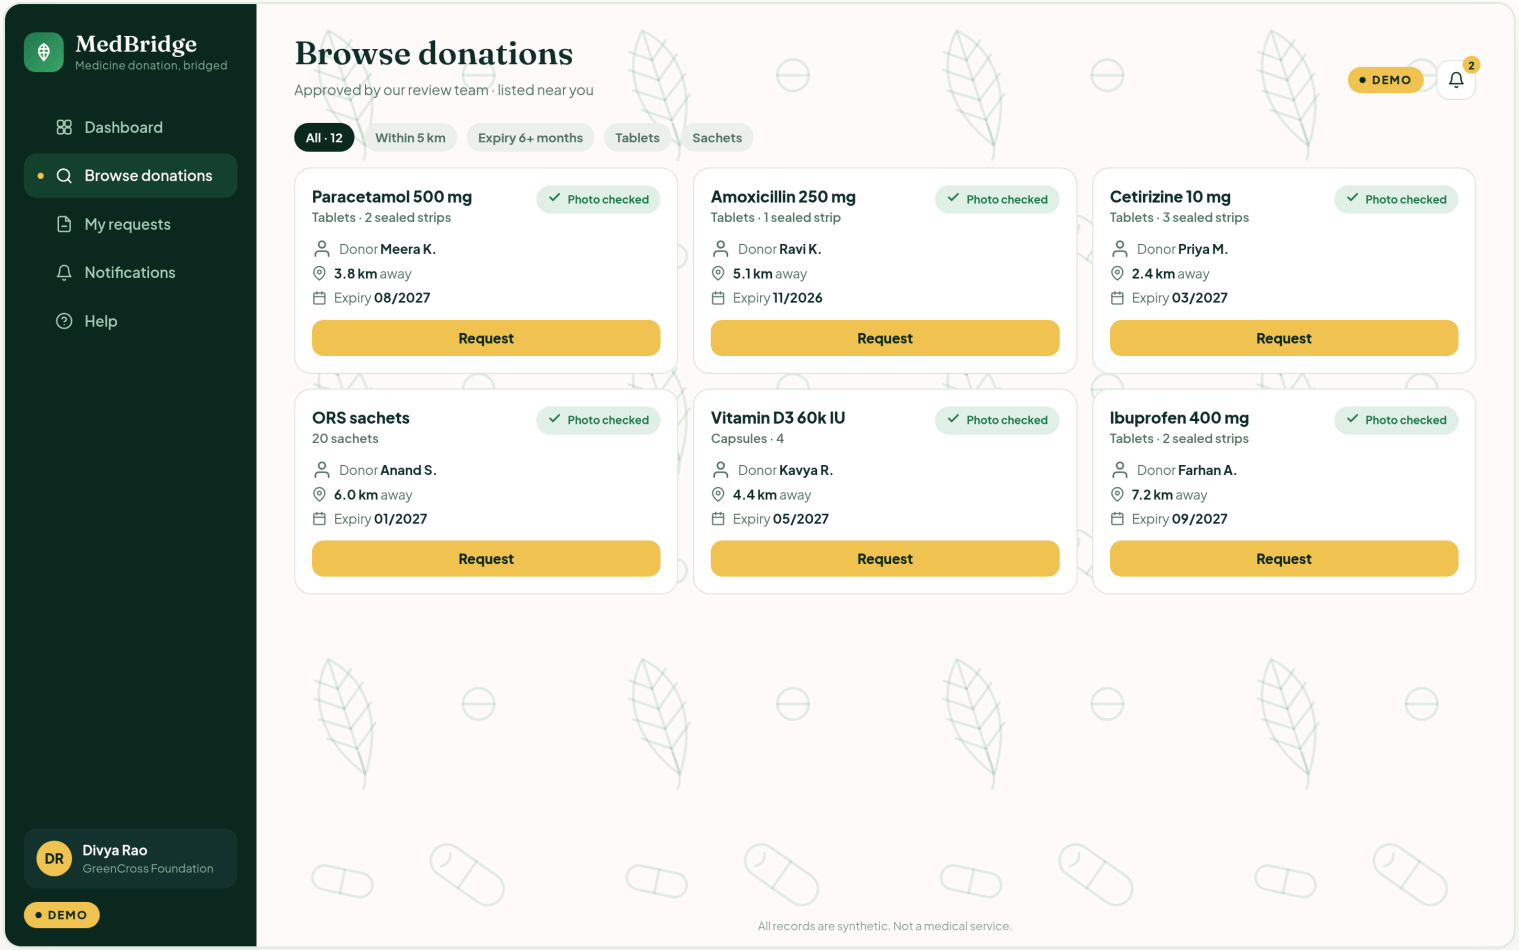

WHAT HAPPENS

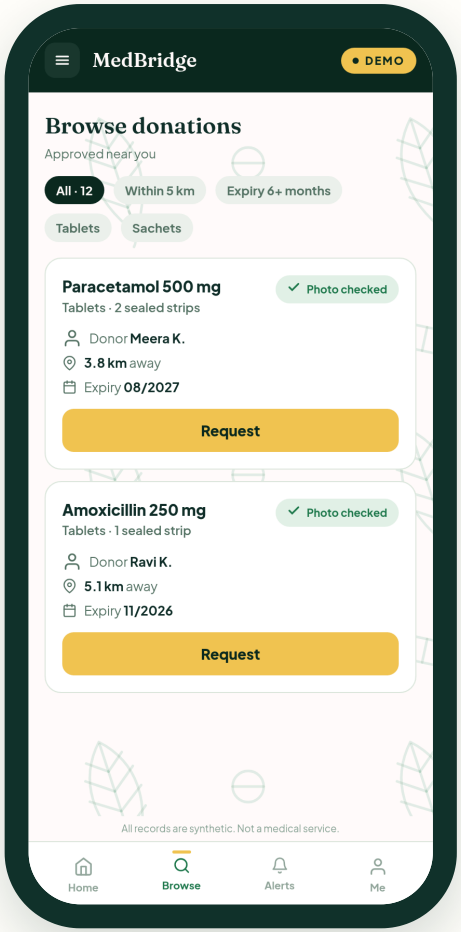

The dashboard opens in a Verified NGO state: the registration was checked by the MedBridge team. Only verified NGOs can browse and request donations.

Who acts
MedBridge review team (human)
Next → Step 3 — Browse approved donations

All records are synthetic. Not a medical service.

3 Browse approved donations

WHAT HAPPENS

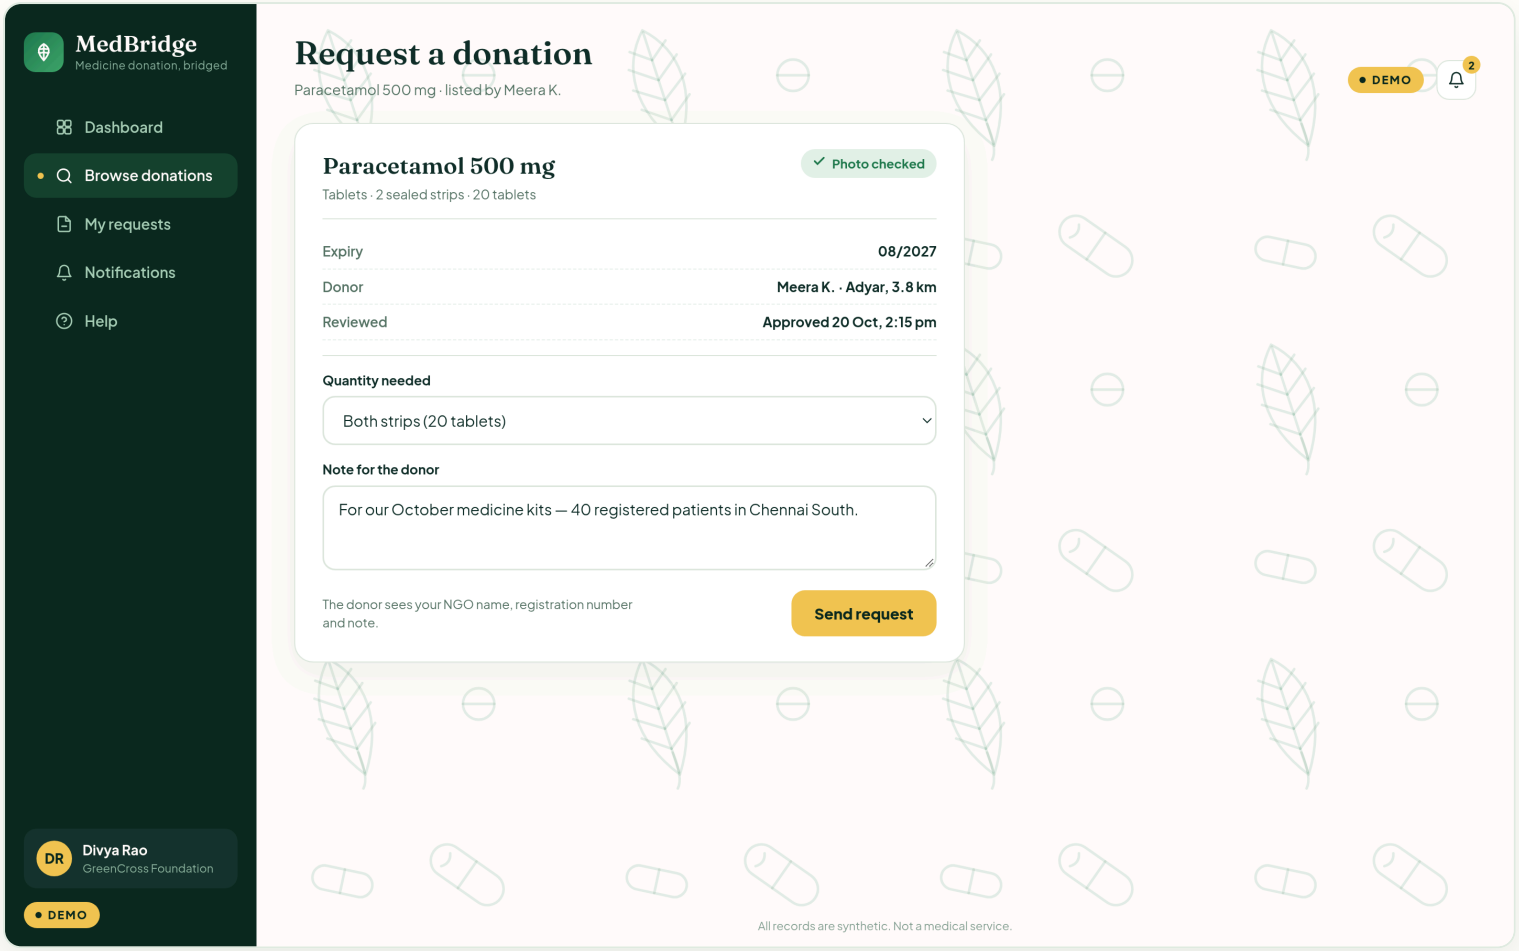

She browses donations that have already passed admin review. Each card shows the medicine, quantity, distance, expiry and a checked label photo.

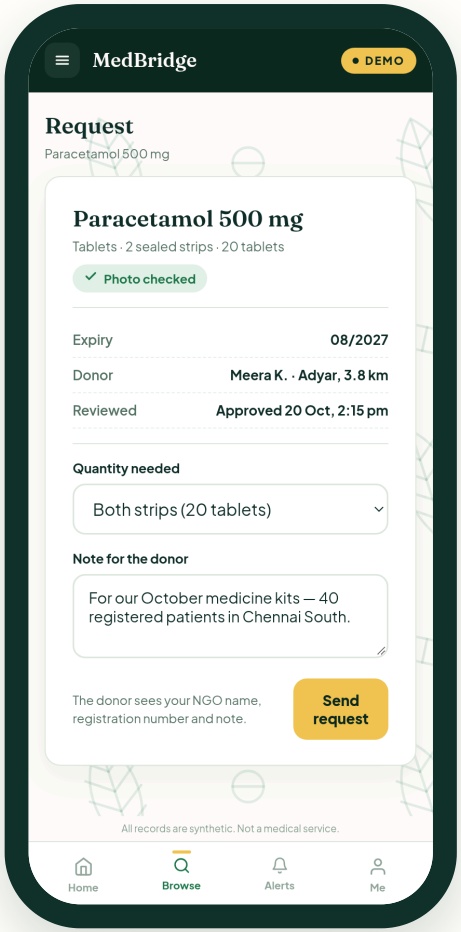

Who acts
The NGO

Next → Step 4 — Request a donation

All records are synthetic. Not a medical service.

4 Request a donation

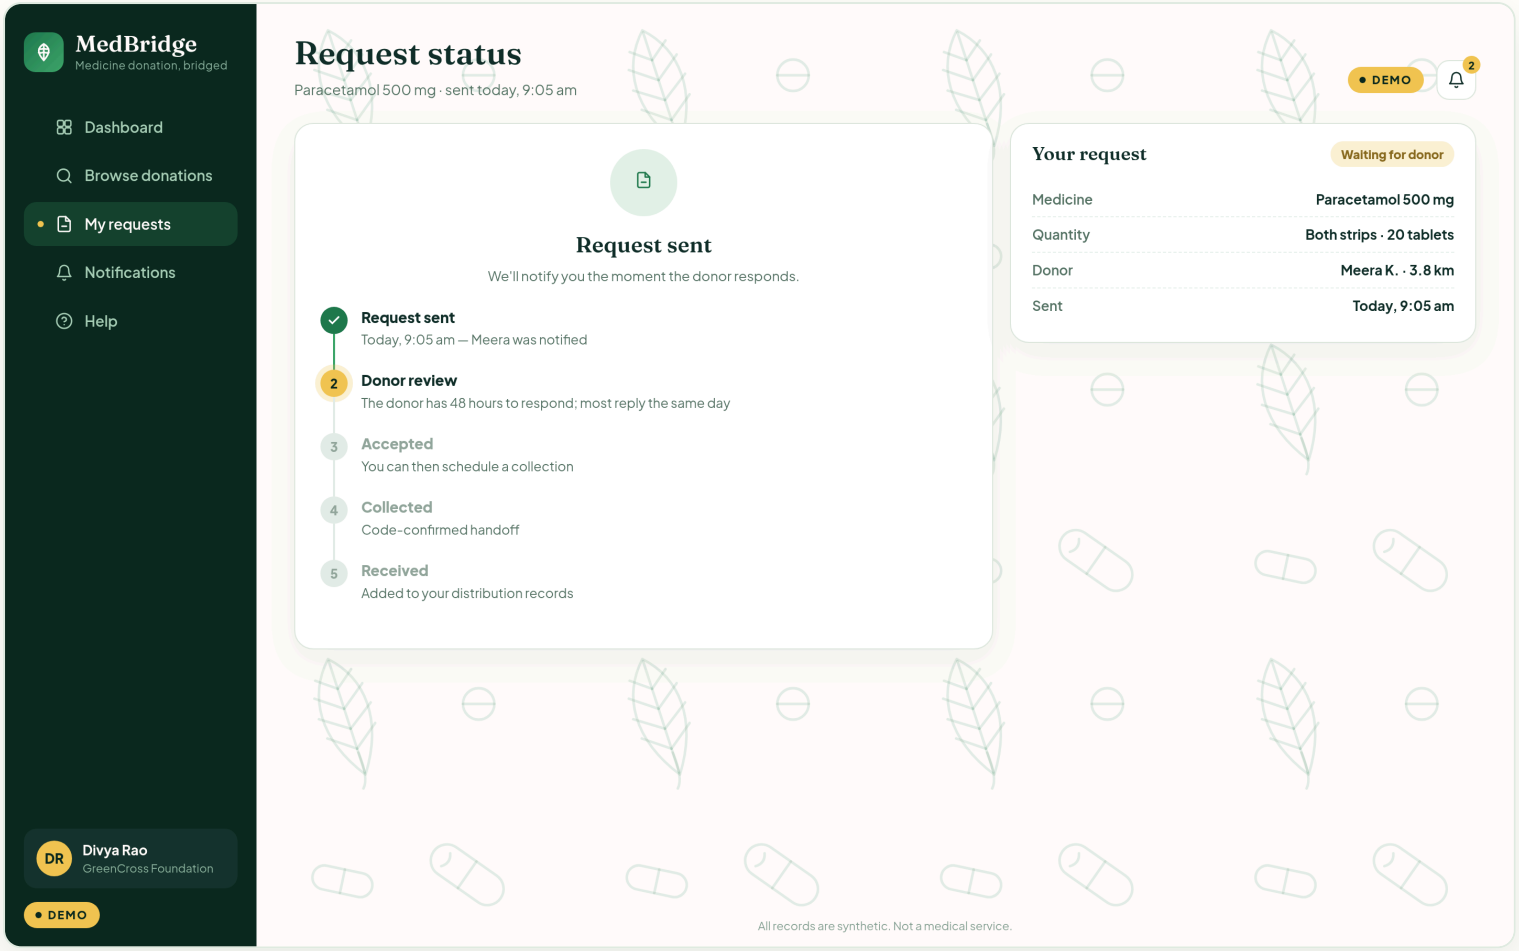

WHAT HAPPENS

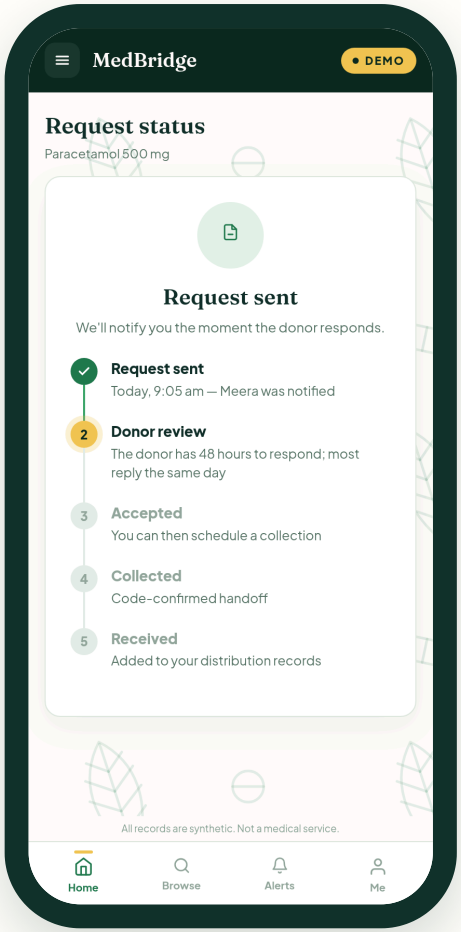

She picks what her patients need, sets the quantity, adds a note for the donor and sends the request. The donor sees the NGO's name, registration and note.

Who acts
The NGO
Next → Step 5 — Request status

All records are synthetic. Not a medical service.

5 Request status

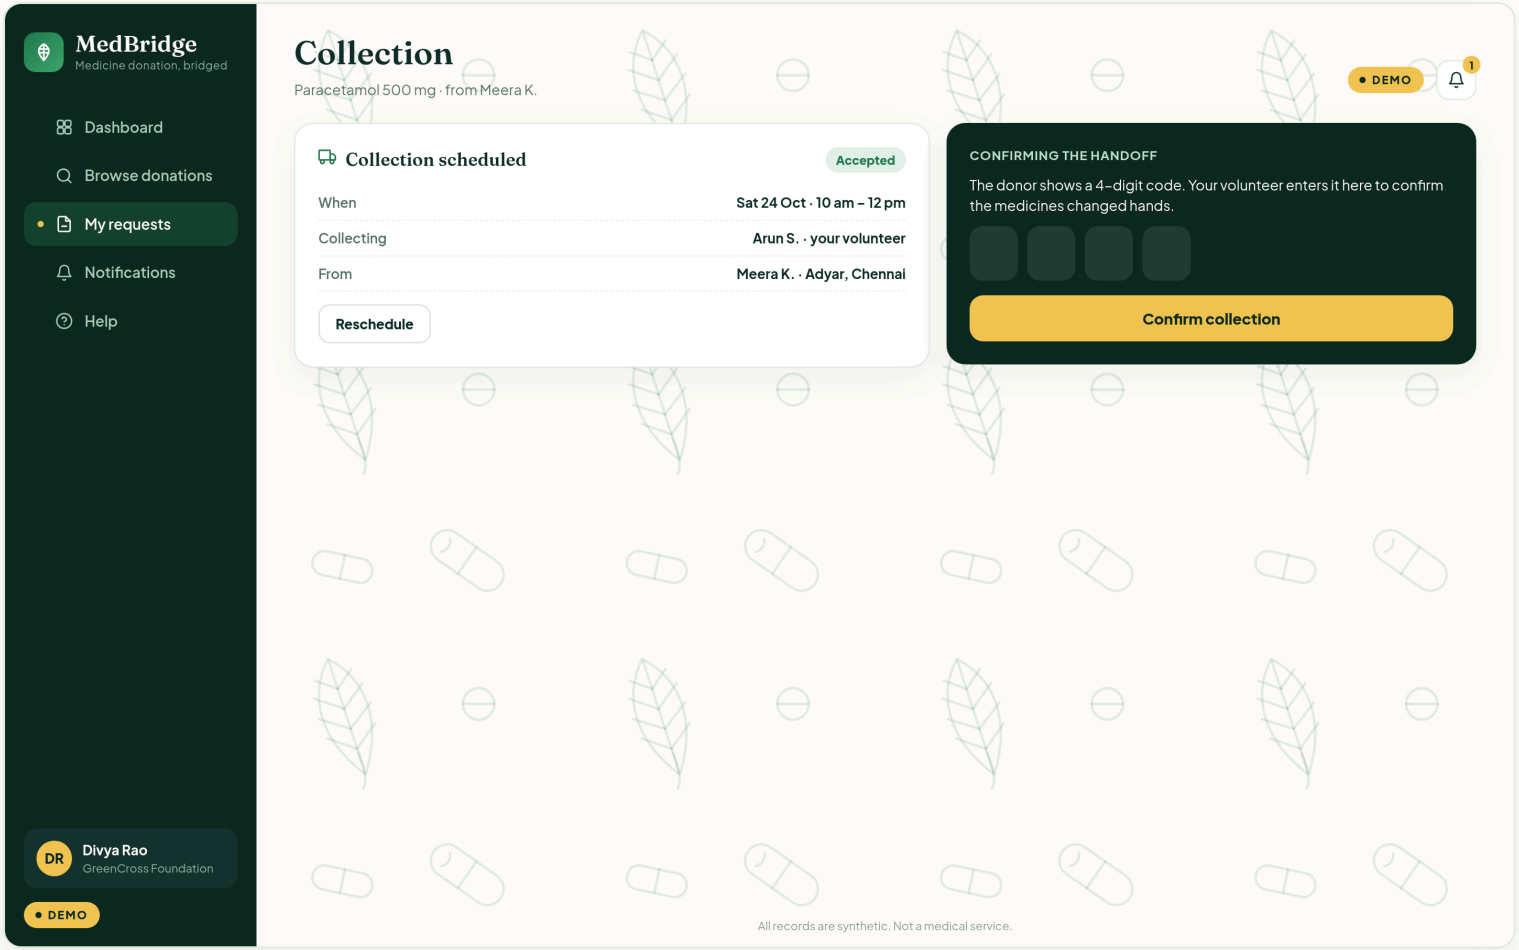

WHAT HAPPENS

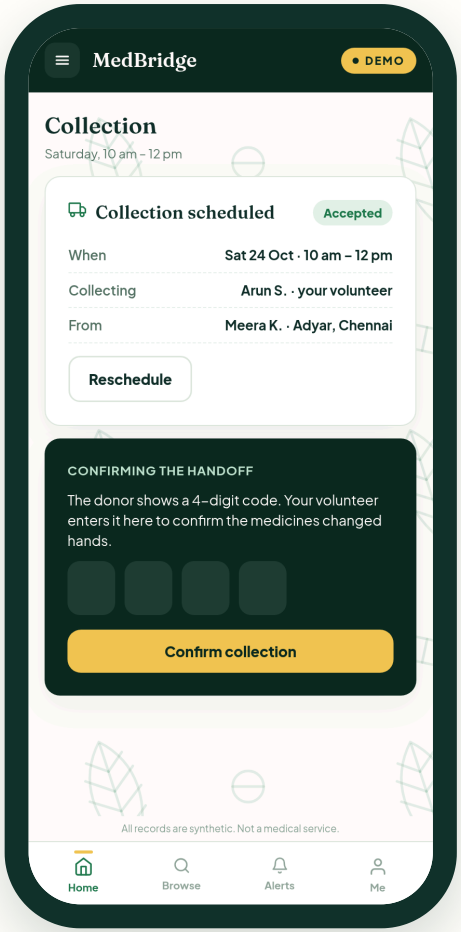

The request now waits for the donor. The timeline shows exactly where it stands, and most donors reply the same day.

Who acts
The donor
Next → Step 6 — Collection & handoff

All records are synthetic. Not a medical service.

6 Collection & handoff

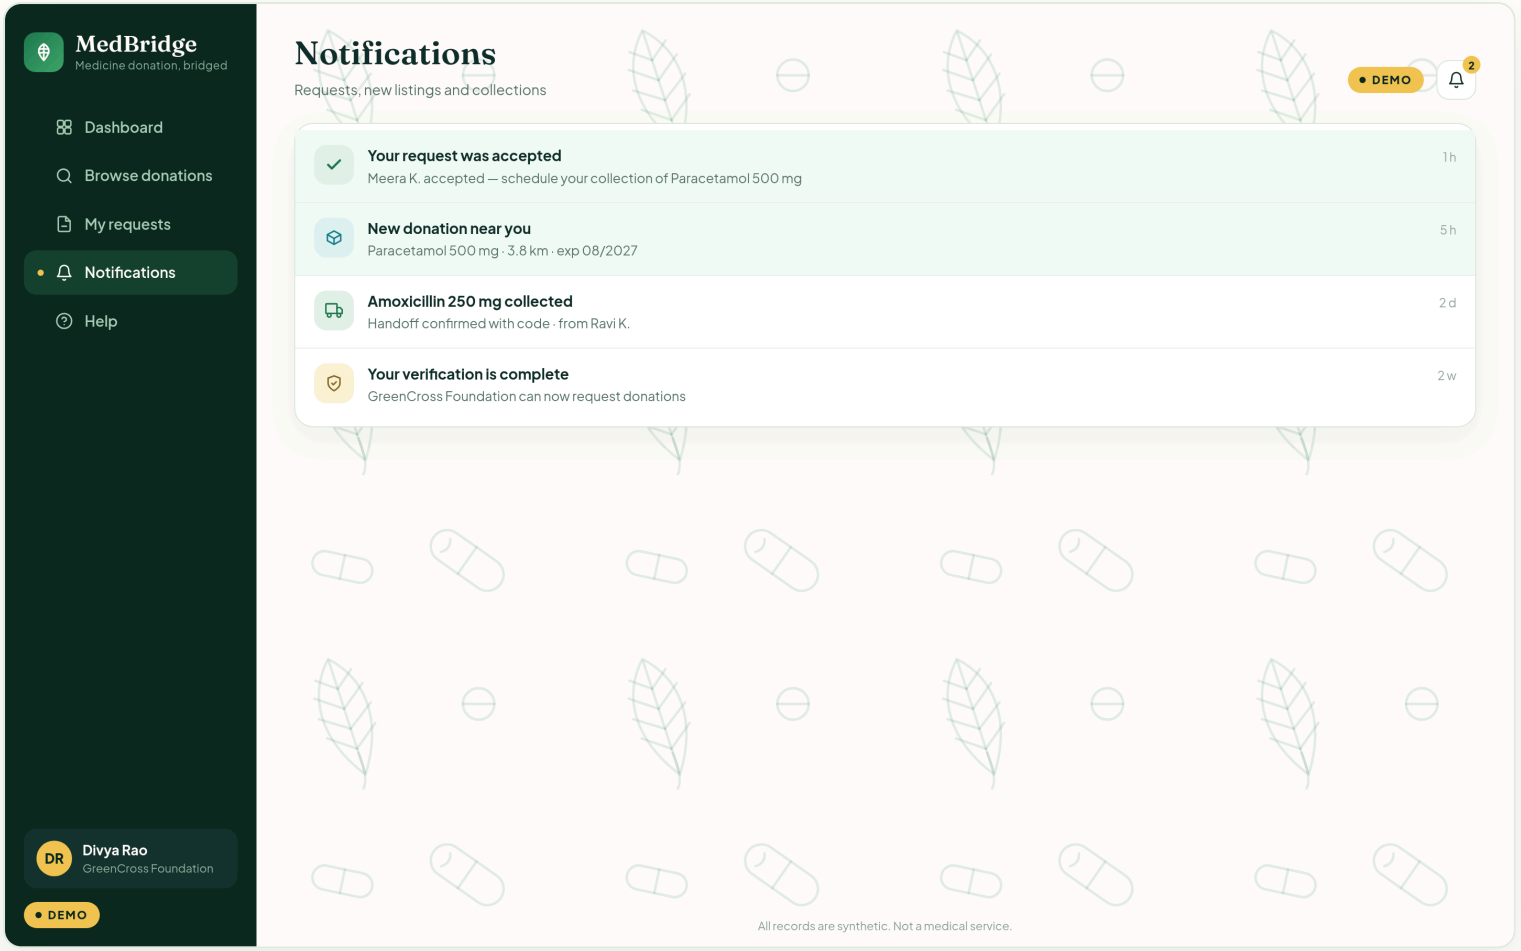

WHAT HAPPENS

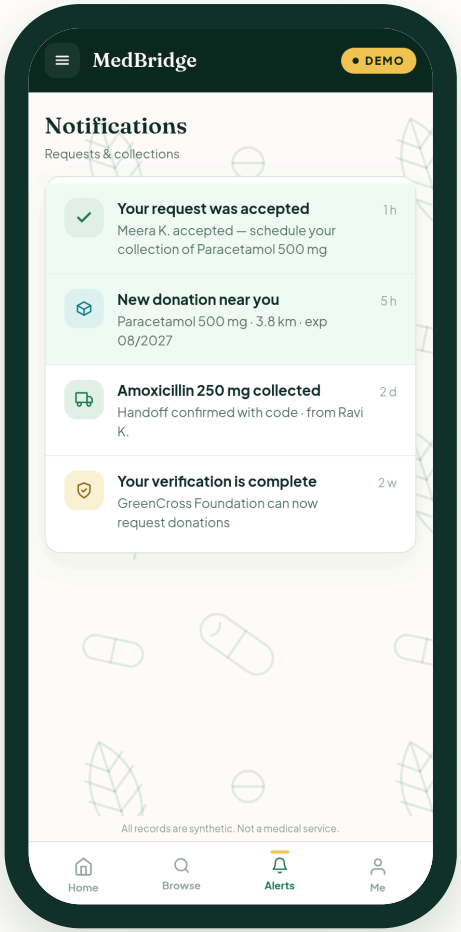

Once accepted, the collection is scheduled. The volunteer collects the medicines and enters the donor's 4-digit code to confirm the handoff.

Who acts
The NGO volunteer and the donor
Next → Step 7 — Notifications

All records are synthetic. Not a medical service.

7 Notifications

WHAT HAPPENS Accepted requests, new listings nearby and confirmed collections all arrive in Notifications.
