MedBridge
Medicine donation, bridged

DEMO

How MedBridge works for Donors

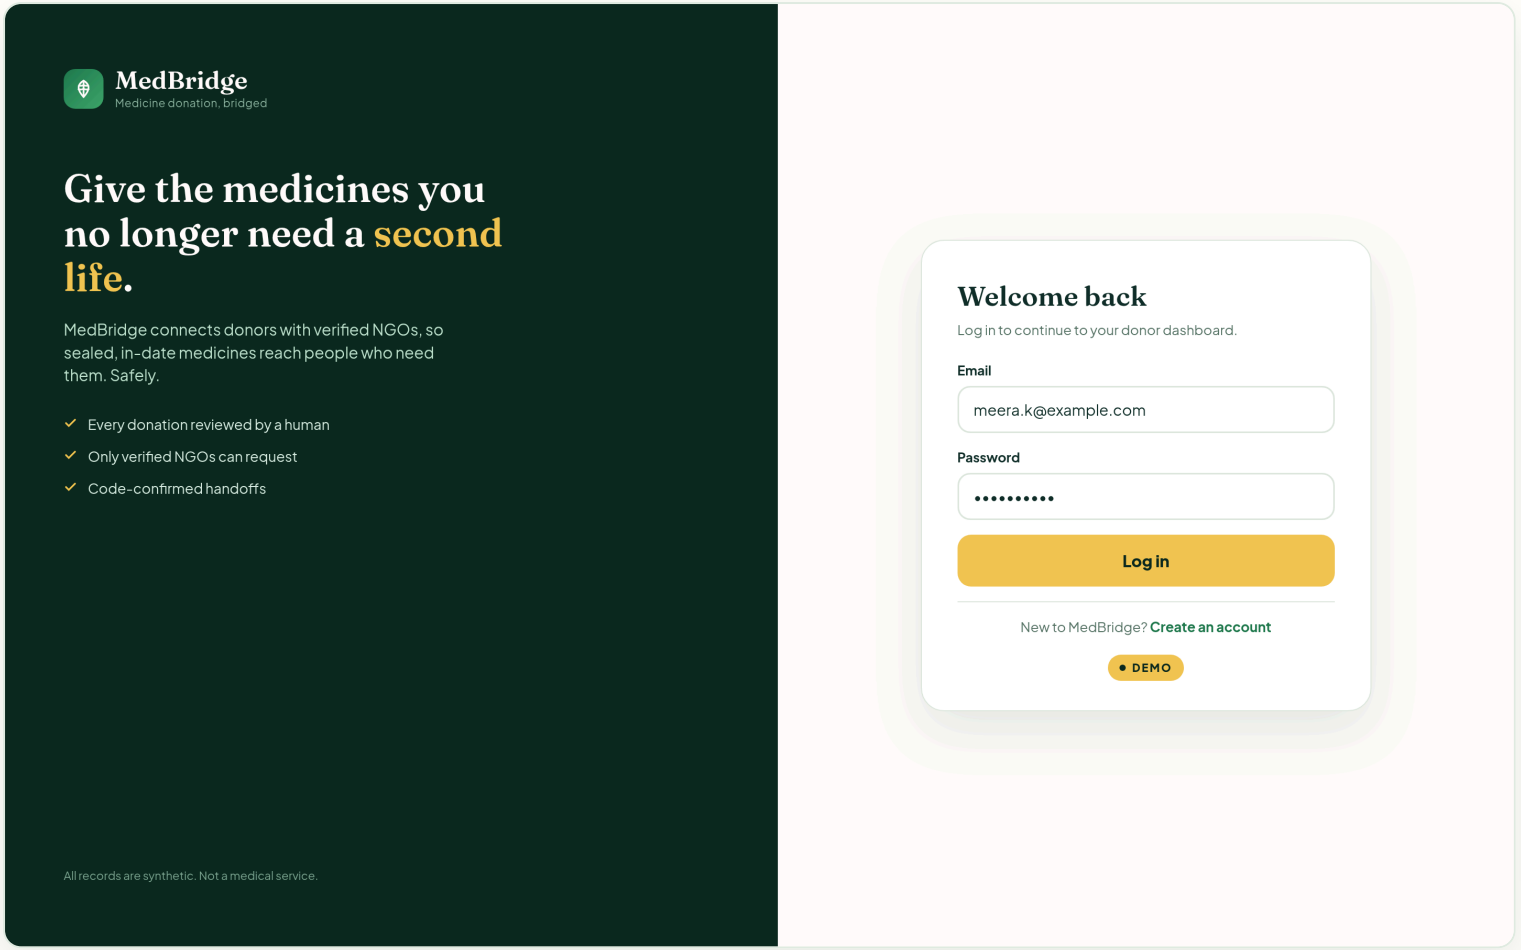

From a strip in your cabinet to a patient who needs it — every screen, step by step.

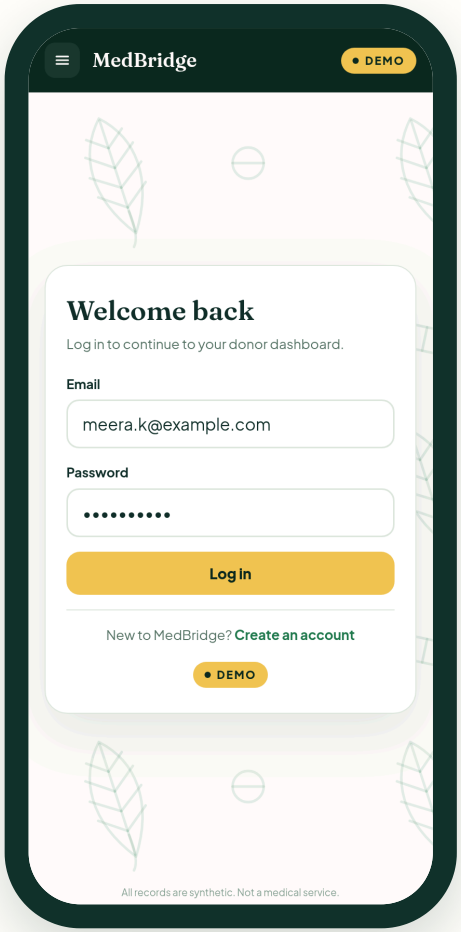

1 Log in → 2 The dashboard → 3 New donation → 4 Photo of the strip label → 5 Condition & submit → 6 Admin review → 7 Approved & listed → 8 An NGO requests it → 9 Collection & handoff → 10 Notifications

Direction 1C concept preview · desktop and phone

All records are synthetic. Not a medical service.

1 Log in

WHAT HAPPENS

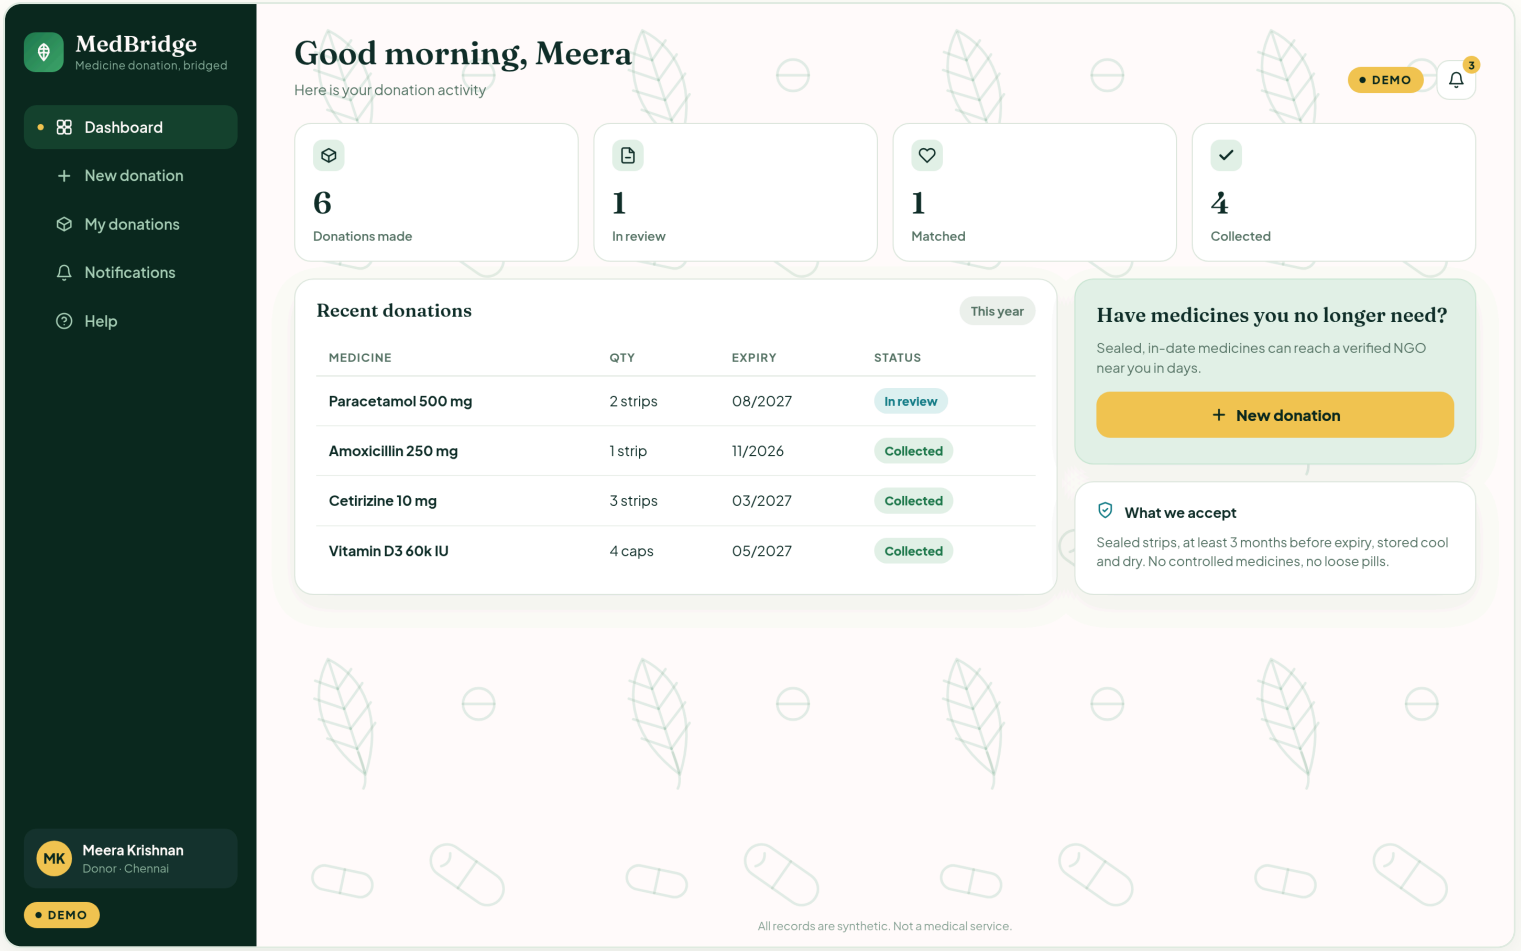

Meera opens MedBridge and logs in with her email and password. New donors create an account from the same screen.

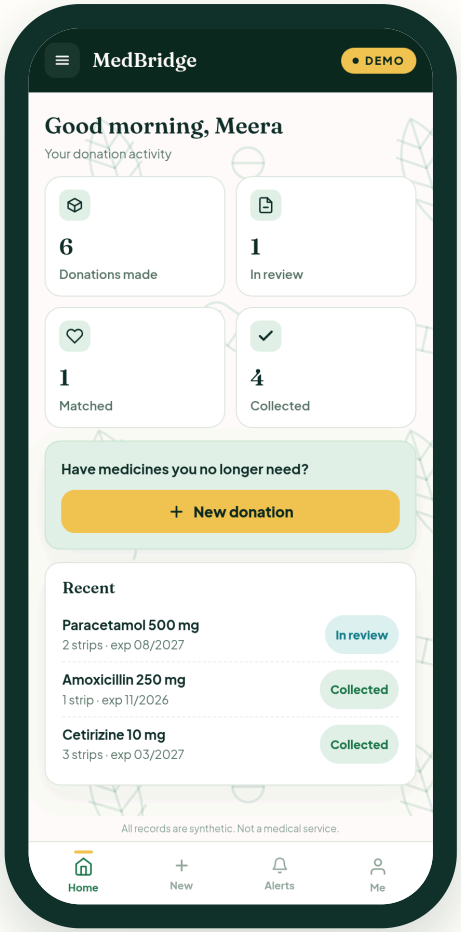

Who acts
The donor

Next → Step 2 — The dashboard

All records are synthetic. Not a medical service.

2 The dashboard

WHAT HAPPENS

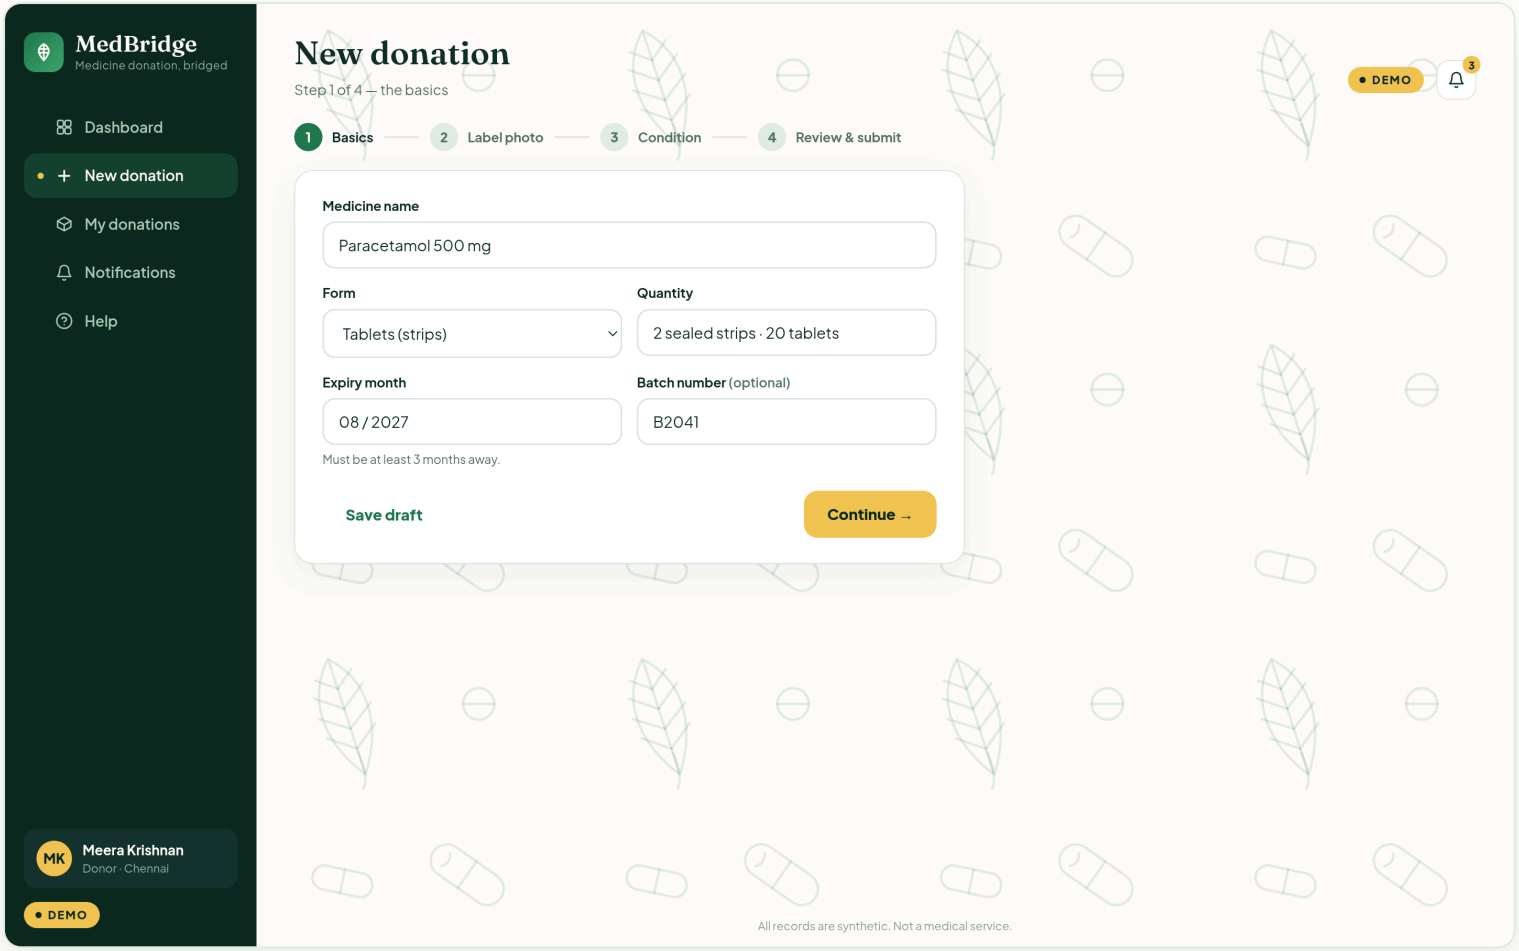

After login she lands on her dashboard: every past donation with its status, and the marigold button to start a new one.

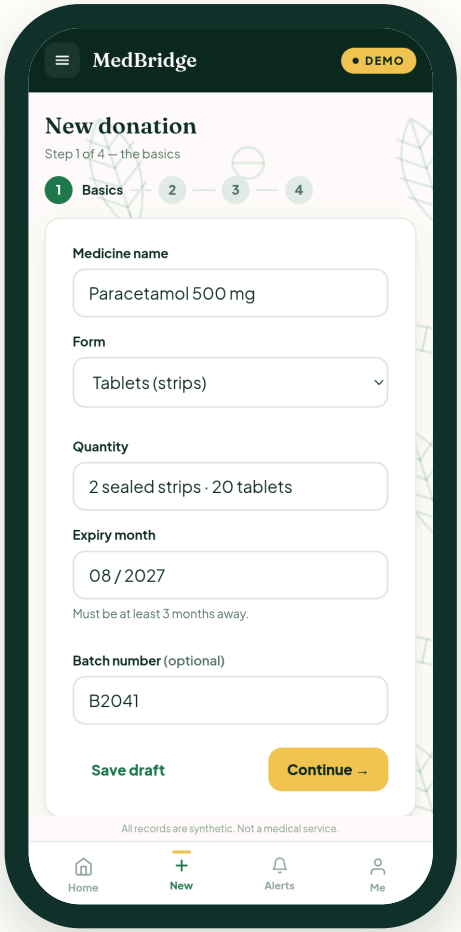

Who acts
The donor

Next → Step 3 — New donation — the basics

All records are synthetic. Not a medical service.

3 New donation — the basics

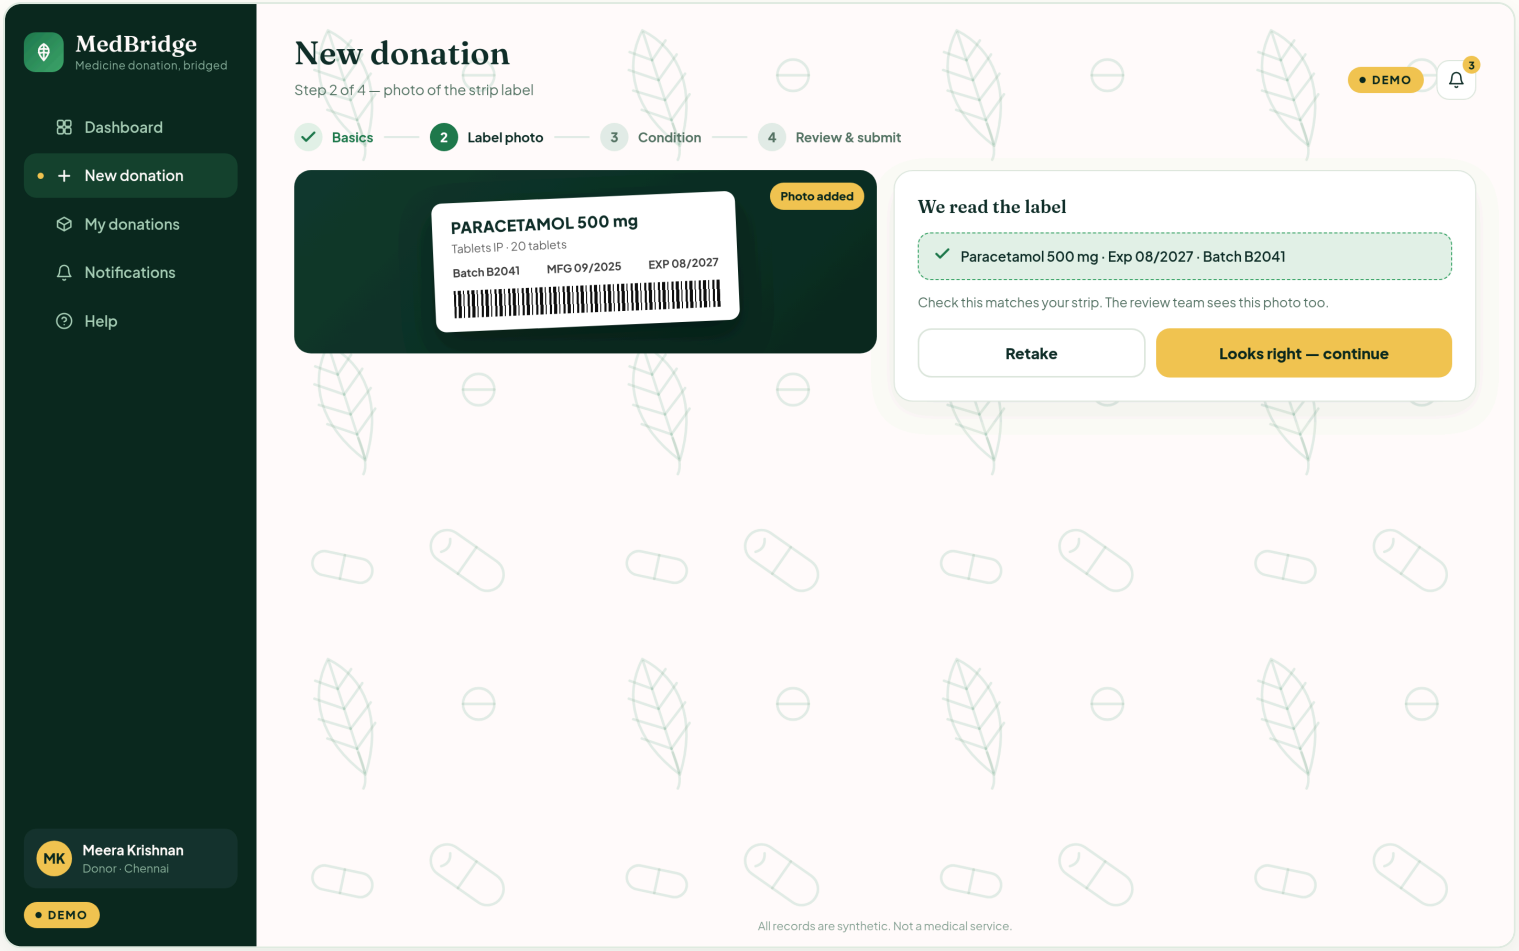

WHAT HAPPENS

She taps New donation and enters the medicine name, form, quantity and expiry month. Medicines under 3 months from expiry are not accepted.

Who acts
The donor
Next → Step 4 — Photo of the strip label

All records are synthetic. Not a medical service.

4 Photo of the strip label

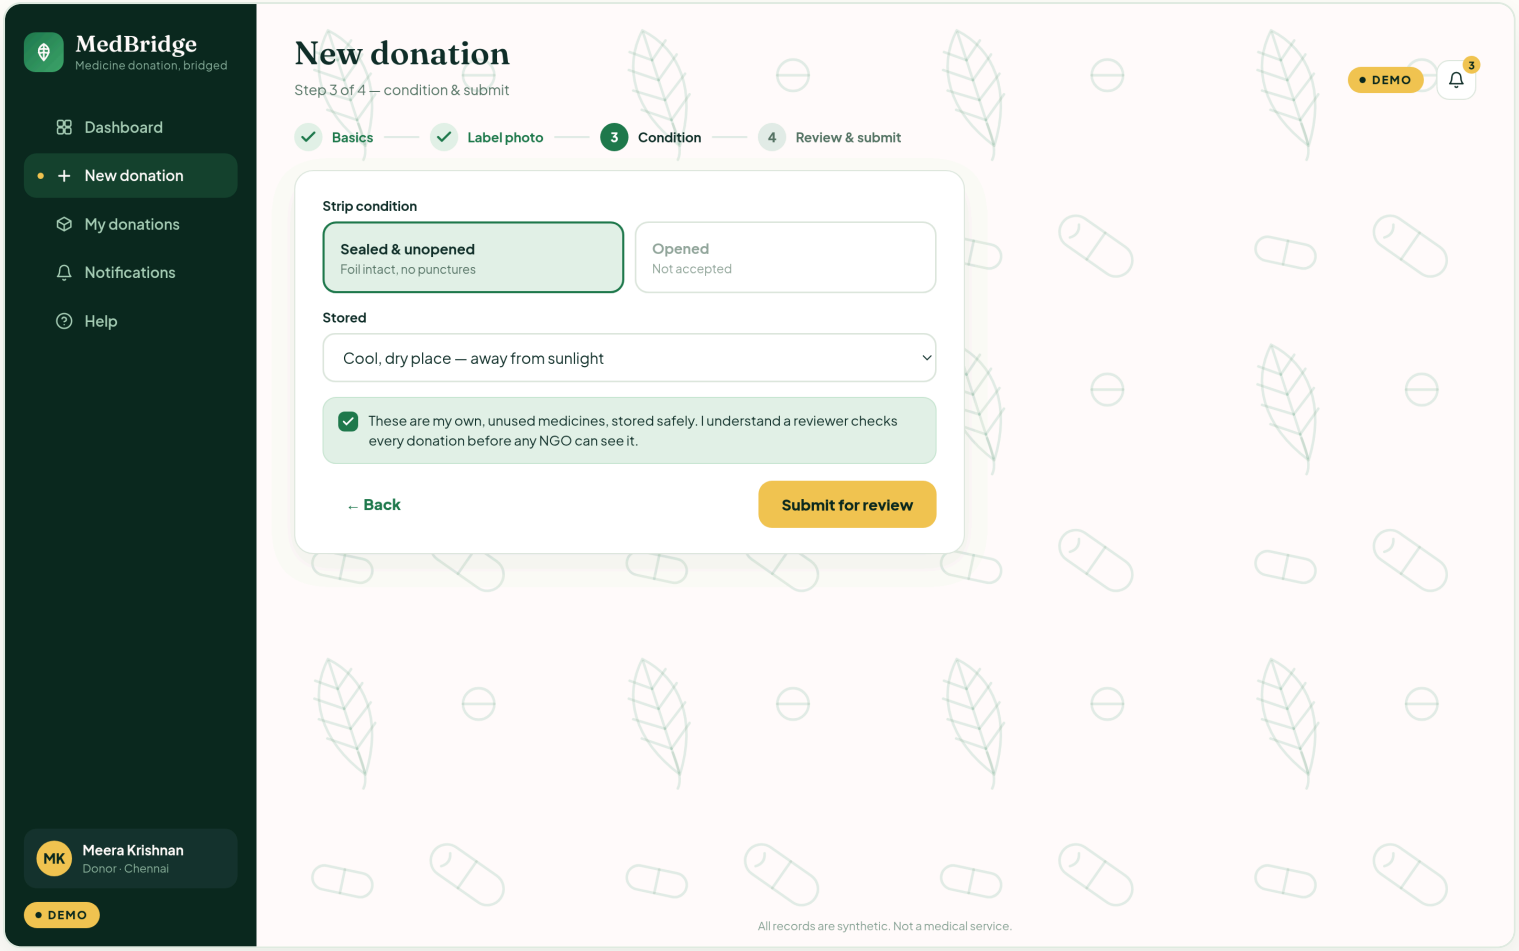

WHAT HAPPENS

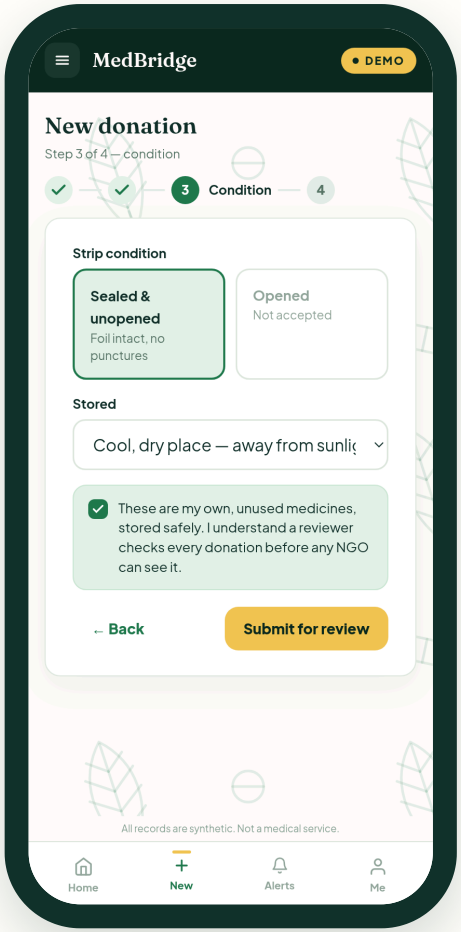

She photographs the strip label. MedBridge reads the name, batch and expiry from the photo, and she confirms they match before continuing.

Who acts
The donor
Next → Step 5 — Condition & submit

All records are synthetic. Not a medical service.

5 Condition & submit

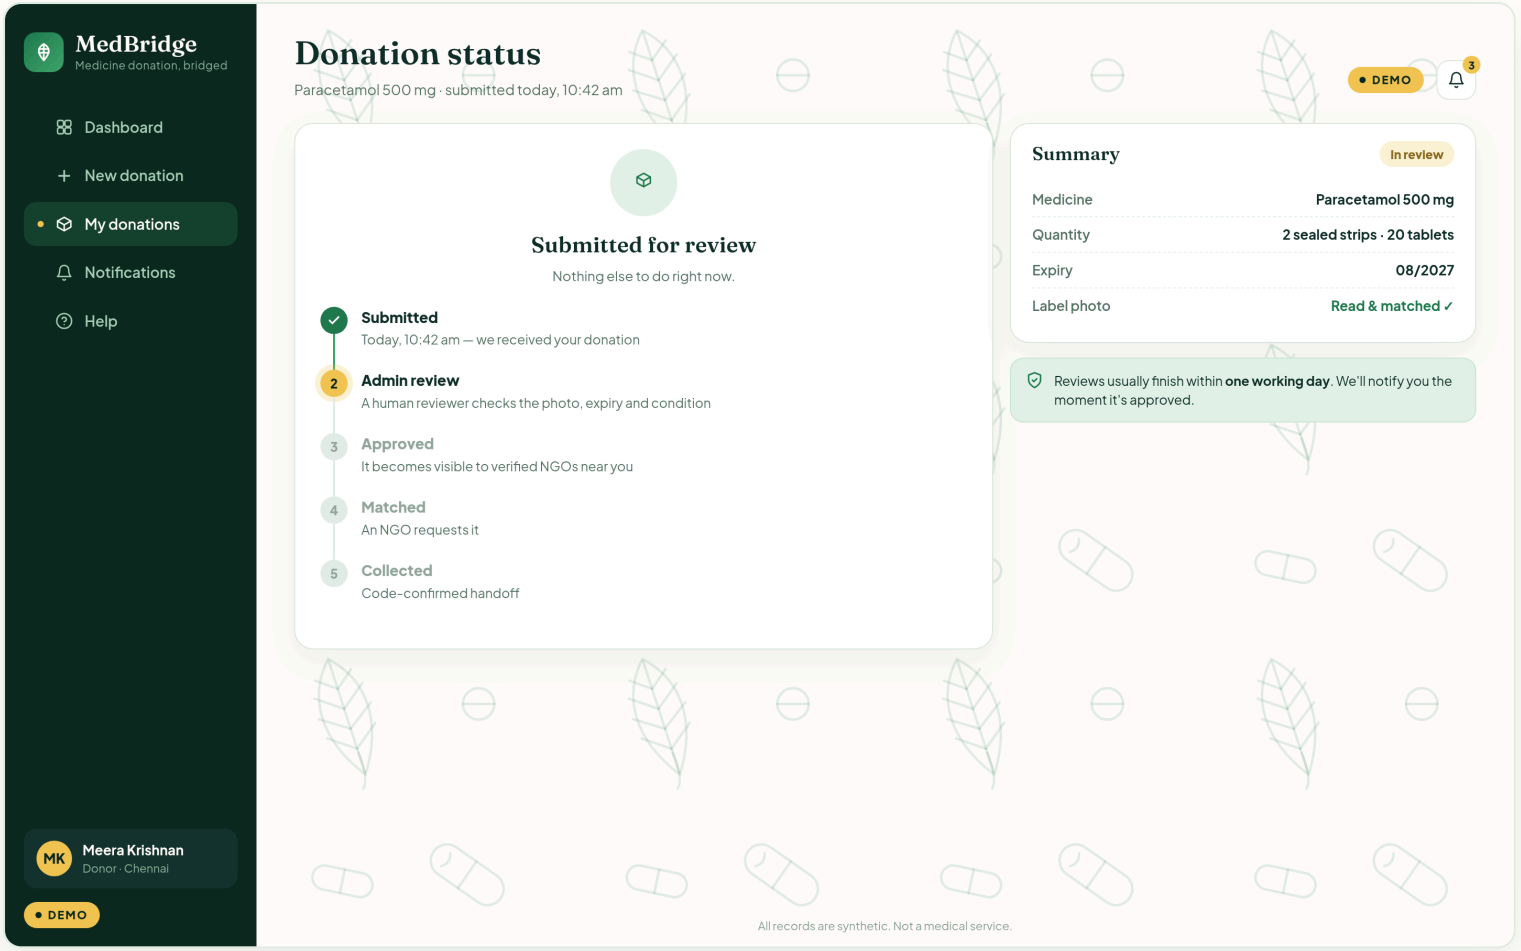

WHAT HAPPENS

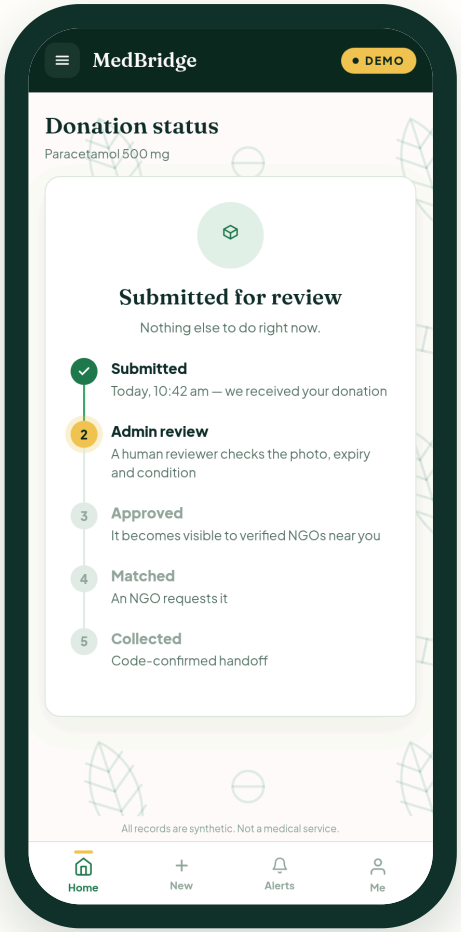

She confirms the strips are sealed and stored safely, accepts the declaration, and submits. The donation now waits for review.

Who acts
The donor
Next → Step 6 — Admin review

All records are synthetic. Not a medical service.

6 Admin review

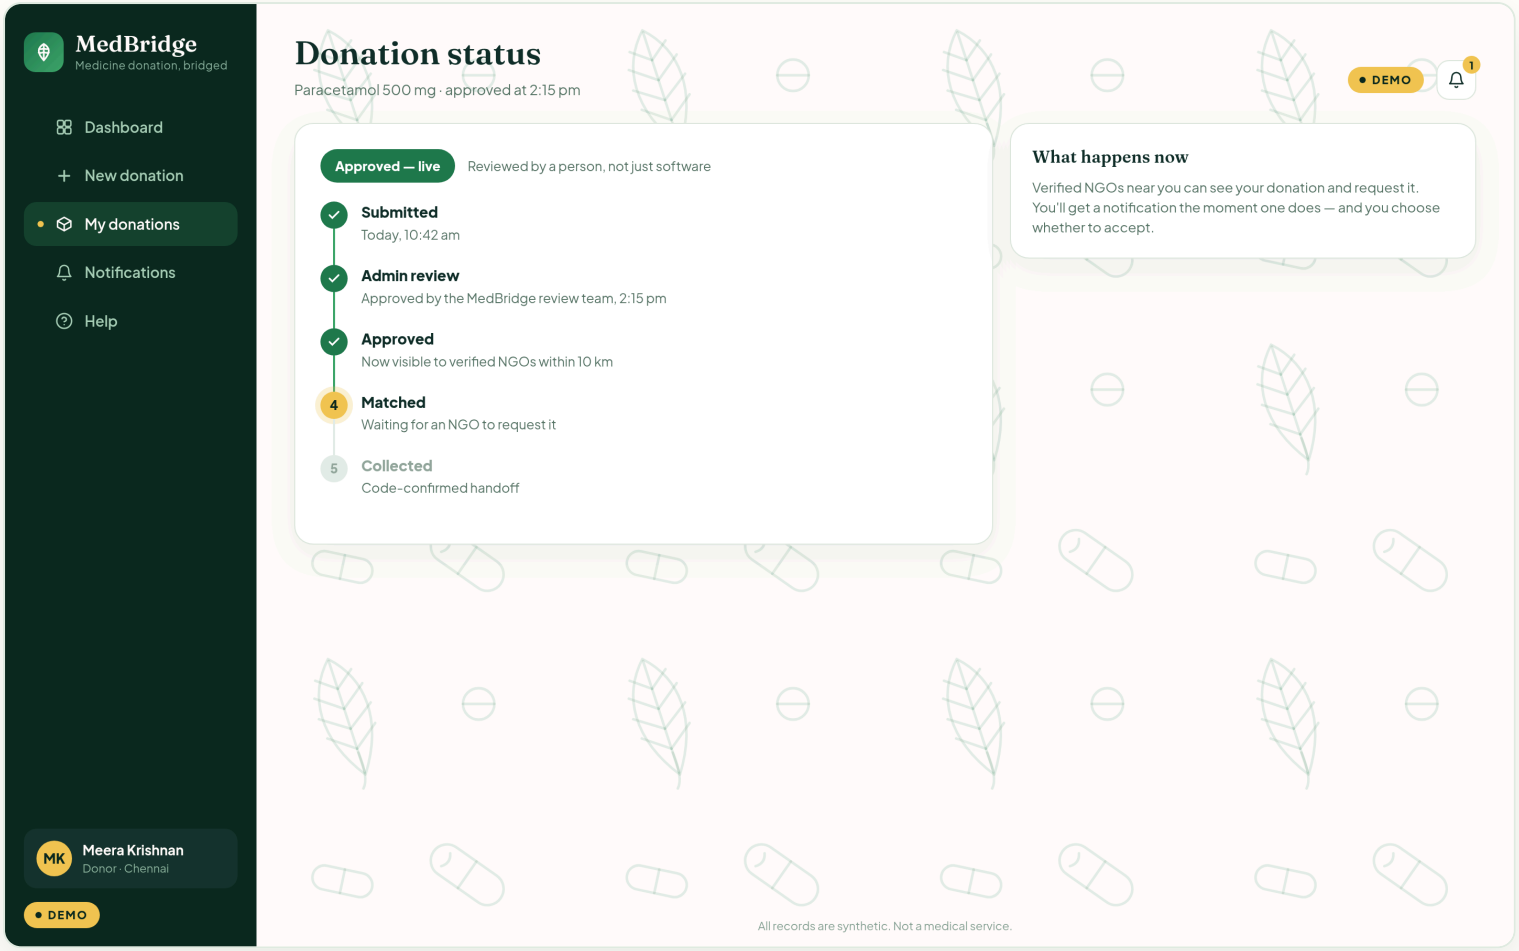

WHAT HAPPENS

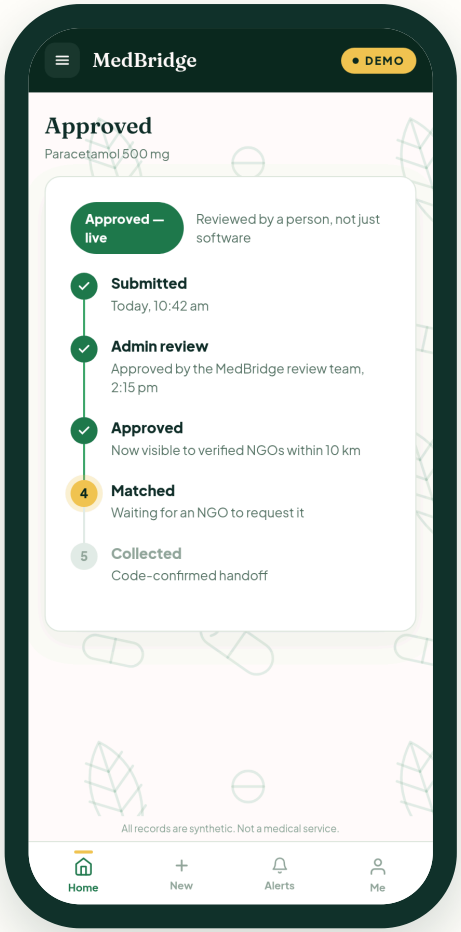

A person on the MedBridge team checks the photo, expiry and condition by hand. Nothing is listed automatically. This usually finishes within one working day.

Who acts
MedBridge review team (human)
Next → Step 7 — Approved & listed

All records are synthetic. Not a medical service.

7 Approved & listed

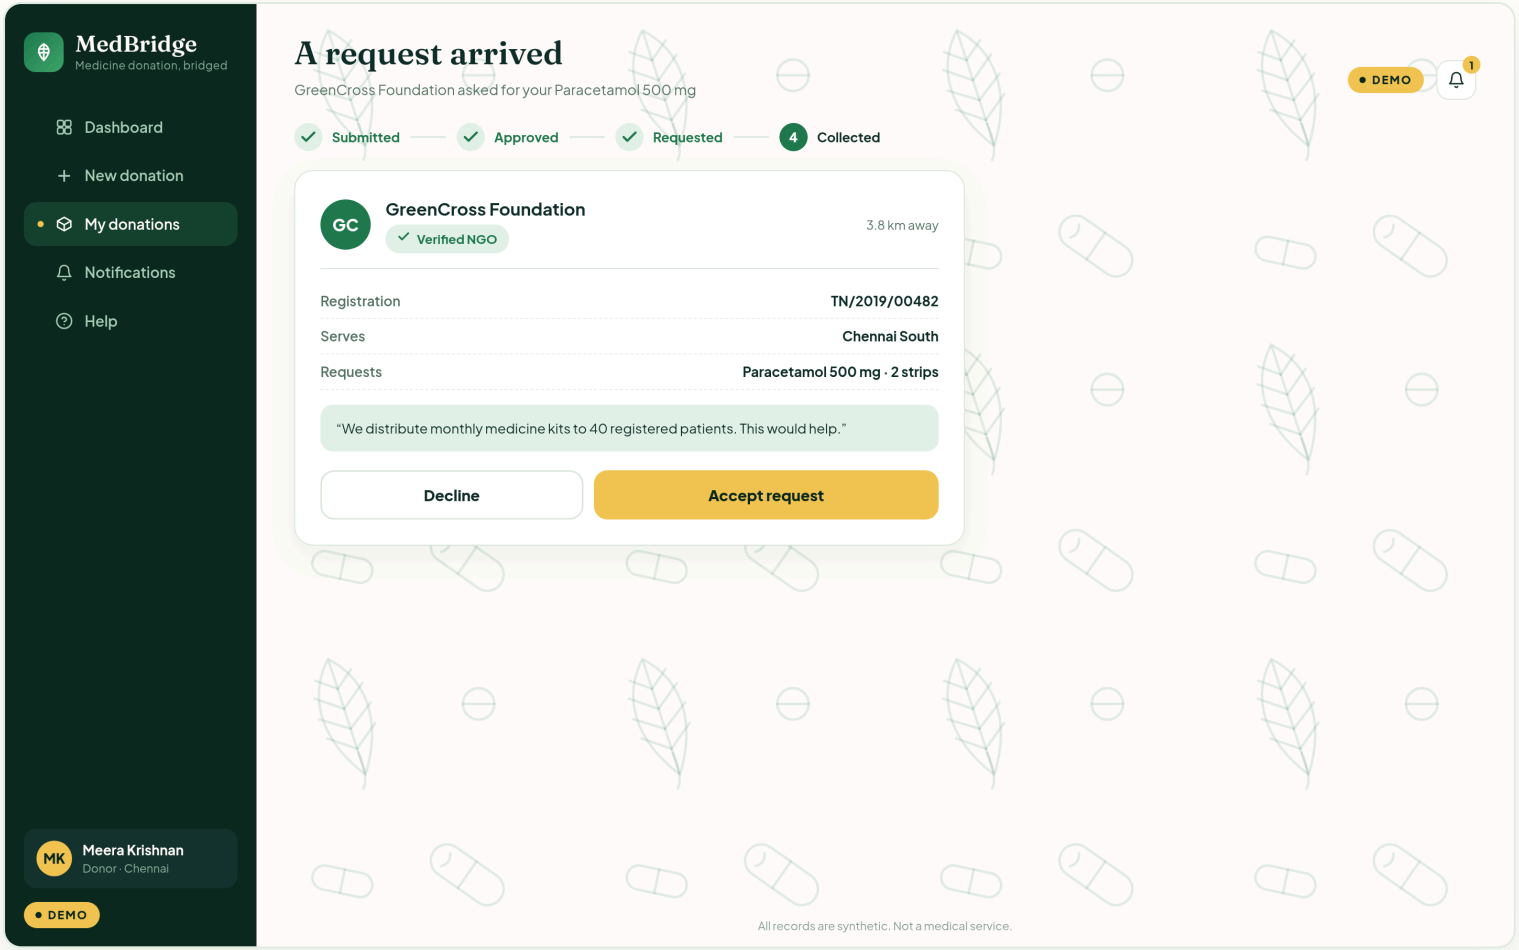

WHAT HAPPENS

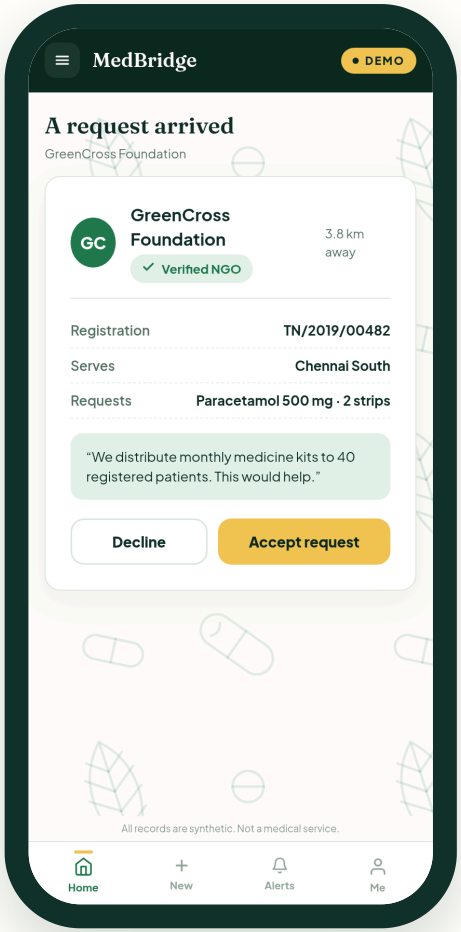

Once approved, the donation becomes visible to verified NGOs within 10 km. Nothing moves yet — an NGO has to request it first.

Who acts
MedBridge review team (human)
Next → Step 8 — An NGO requests it

All records are synthetic. Not a medical service.

8 An NGO requests it

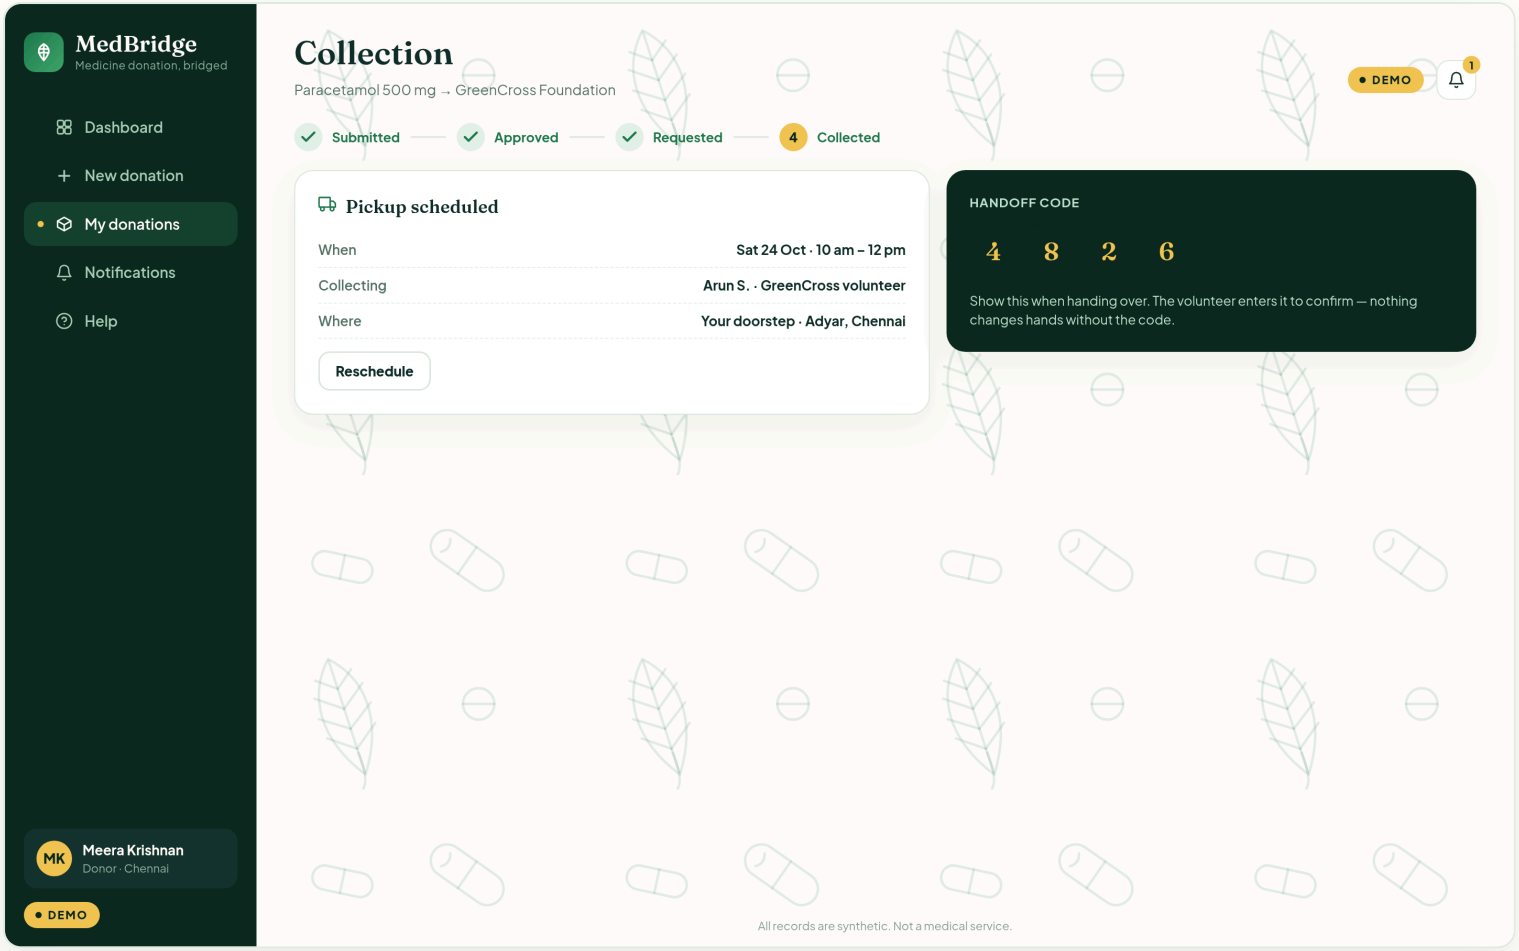

WHAT HAPPENS

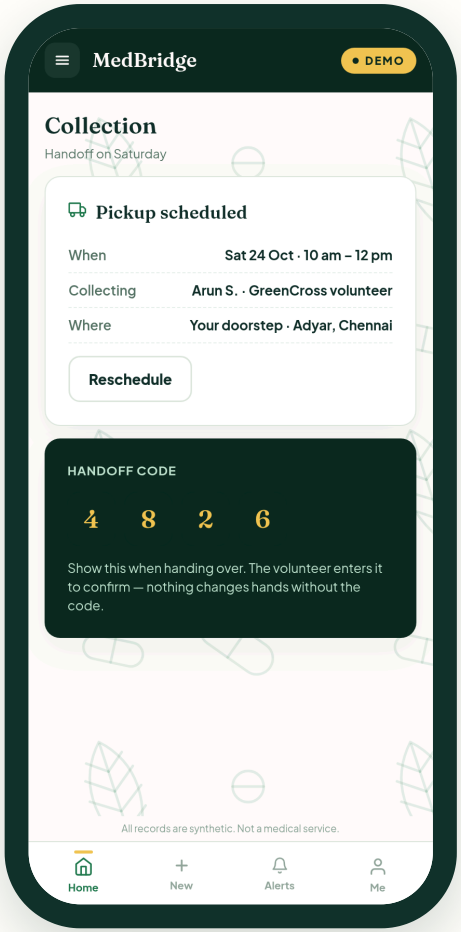

GreenCross Foundation sends a request with a note. Meera sees the NGO's name, registration number and verification status, and chooses to accept or decline.

Who acts
The NGO, then the donor
Next → Step 9 — Collection & handoff

All records are synthetic. Not a medical service.

9 Collection & handoff

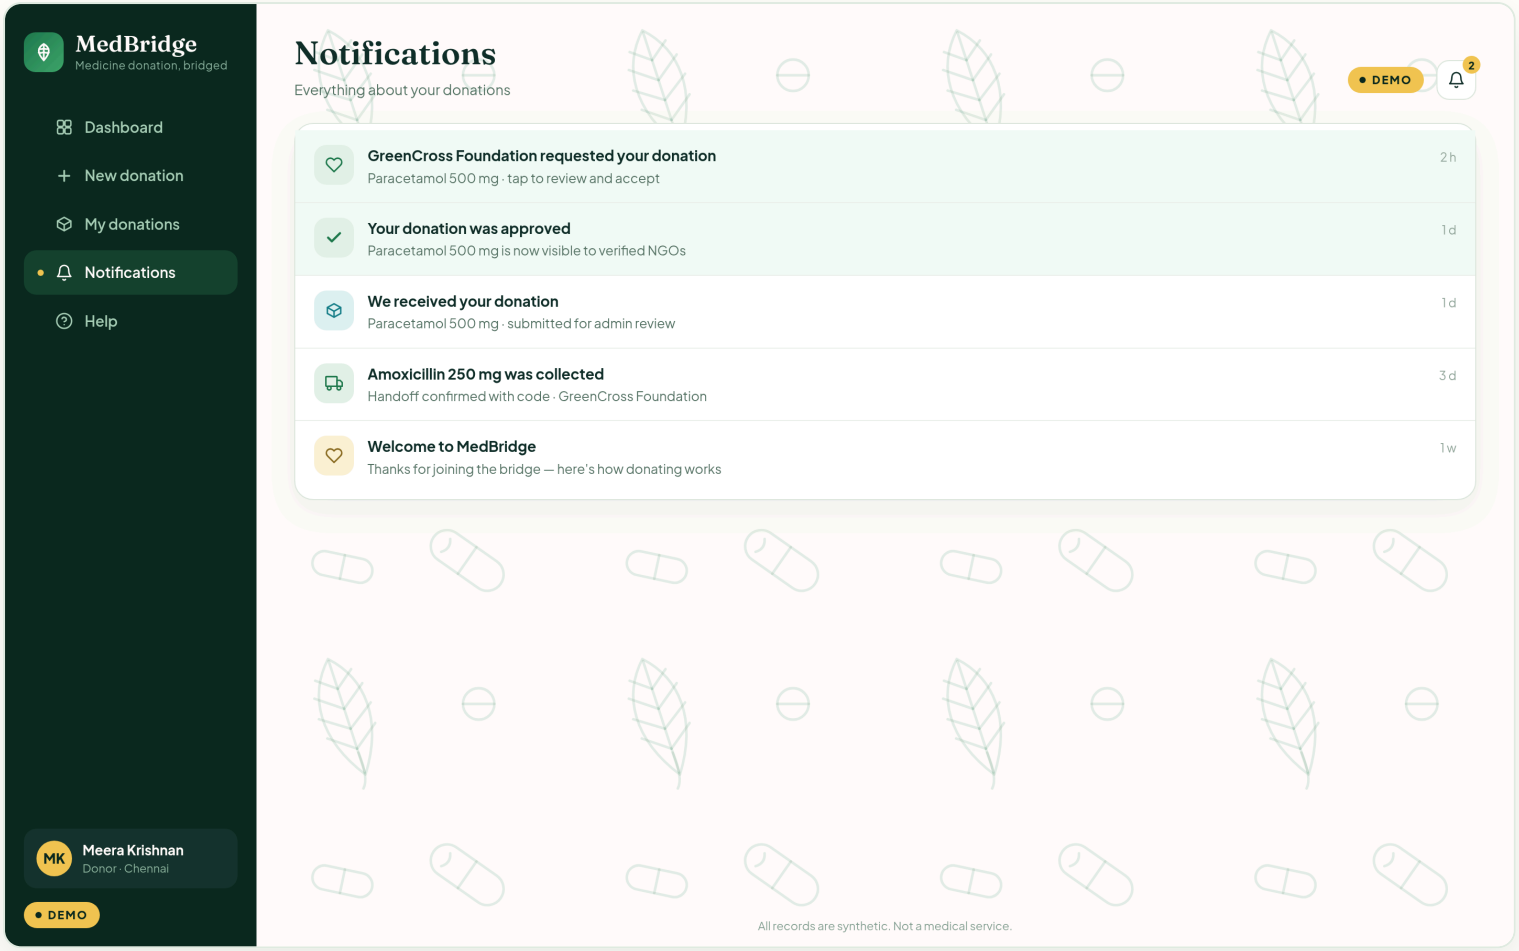

WHAT HAPPENS

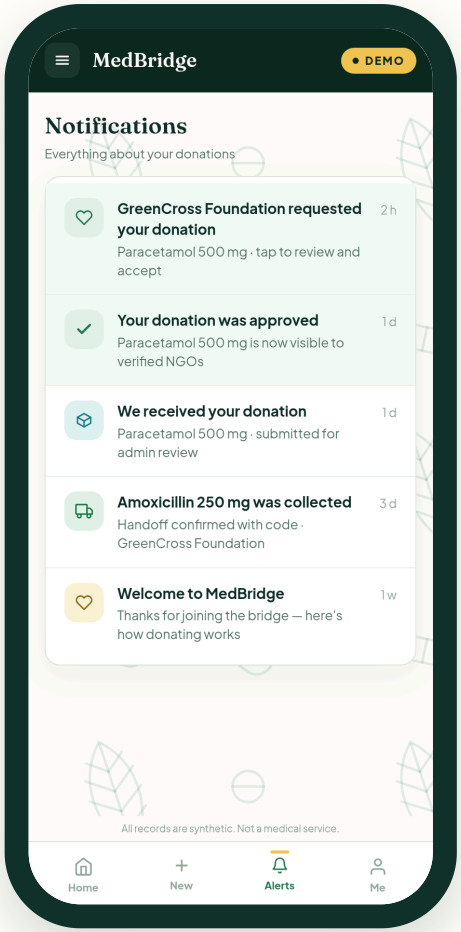

After she accepts, a pickup is scheduled. At the doorstep she shows a 4-digit code; the volunteer enters it to confirm. No code, no handoff.

Who acts
The donor and the NGO volunteer
Next → Step 10 — Notifications

All records are synthetic. Not a medical service.

10 Notifications

WHAT HAPPENS

Every step — approval, request, pickup, confirmed handoff — lands in Notifications, so she always knows where her medicines are.

Who acts
MedBridge
End of the walkthrough

All records are synthetic. Not a medical service.
